

Personal Electronic Dosimeter (PED)

TRACERCO™ PED

We have created a device that gives exceptional performance in the most challenging environments.

The easiest personal radiation monitor to read and operate on the market.

Perfect for both radiation specialists and those who are not working with radiation every day. It's safe to use in potentially explosive areas, robust and reliable, making it ideal for challenging environments.

Everything on the device has been designed with the user in mind; the display system features graphical measurements, a diagram of a person who fills with color depending on radiation dose received and the DoseVision™ software interface is plug and play allowing easy set-up and data analysis in a few minutes.

Other benefits of the monitor include:

- Weatherproof and easy to decontaminate
- Lightweight
- Extra large memory reducing the risk of data being overwritten

- Easy to read with a large clear display
- Three measurement modes and four alarm settings
- Vibration feature in addition to an audible alarm for noisy environments
- Provides a combined "two in one" solution for a direct reading dosimeter and alarm ratemeter for US and Canada industrial radiography requirements

Accessories available with the monitor include:

- Portable in car charger
- Travel case
- Travel pack, which includes in car charger, voltage adaptors and a small travel dock
